

I am Antonio Figuerola, and I am honored to have been nominated for NAPHA's Board of Directors.

I have a deep passion for Peruvian horses and a profound love for the breed. I honor my Peruvian heritage while embracing our American identity. Fluency in both English and Spanish is a valuable asset to help bridge the communication gap with our sister organizations.

I believe that NAPHA's most significant challenge lies in the number of horses being bred and shown. I am hopeful that my strong leadership abilities and years of experience in business can make a significant difference in turning things around.

This year at Figuerola Peruvians, LLC, we welcomed three ARF Figuerola foals: elegant, strong, and possessing superb *Pisos*. Furthermore, we have a few mares expecting foals for the upcoming season. I am enthusiastic about continuing our family tradition alongside my mother, Rossana Figuerola, and my brother, Alejandro Figuerola. To discover more about us, please visit [www.figuerolaperuvians.com](http://www.figuerolaperuvians.com).

In my role as Vice President of Figuerola Labs, a nutritional supplement company dedicated to enhancing the well-being of people, pets, and horses through quality nutrition, I oversee production, distribution, sales, and marketing, working closely with our specialized teams. I have played a pivotal role in the growth of our business. For additional information, please visit: [www.figuerolalabs.com](http://www.figuerolalabs.com).

I have served as the Chair of the Marketing Committee of NAPHA and am eager to grow our membership and identifying new prospective breeders to assist in preserving and perpetuating our American legacy of Peruvian Horses in the U.S.

Thank you your trust and support!
